SUBJECT INDEX

VOLUMES 40-44

- Acetohydroxy acid synthase isoenzymes
E. coli K-12, 43:42
- Acholeplasma*
 membrane fluidity regulation, 42:414
- Acholeplasma laidlawii*
 sugar transport, 42:414
 viruses, 42:414
- Acid-fastness
Mycobacterium, 41:217
- Actinomycetales*
 reproduction, 40:469
- Actinomycetes*
 antibiotic production, 41:595
 conjugation, 41:595
 control of sporulation, 40:469
 development, 40:469
 differentiation, 40:469
 life cycles, 40:469
 recombination, 41:595
 spore formation, 40:469
- Actinorhodin
 biosynthesis, 41:595
- Additive recombination
 bacteria, 41:872
- Adenine nucleotides
 fungal metabolism, 41:822
 microbial ecology, 44:739
- Adenosine tetraphosphate
 in eucaryotes, 43:27
- Adenosine triphosphatase
 mycoplasma membrane, 42:414
- Adenosine triphosphatase complexes
 morphology and location, 41:47
 proton-translating properties, 41:47
 purification of F₁-ATPase, 41:47
- Adenosine 5'-triphosphate
 biomass indicator, 44:739
- Adenosine triphosphate synthesis
 thermodynamic efficiency, 41:100
- Adenylate cyclase
V. cholerae and enterotoxigenic *E. coli*, 42:592
- Adenylyl sulfate reductase
 bacterial, 43:384
- Adrenal cells
 effects of *V. cholerae* and enterotoxigenic *E. coli*, 42:592
- Aerobic bacteria
 ferredoxin-dependent reactions, 43:384
- Aerobic degradation
 enzymatic steps, 40:403
 of purines, 40:403
- Aerobic soils
 sulfur cycle, 40:698
- Aeromonas salmonicida*
 carbamoyl phosphate biosynthesis and utilization, 42:307
- Aerotaxis
 in spirilla, 40:55
- Aflatoxins
 biosynthesis, 41:822
- African trypanosomes
 biologically active products, 42:661
- Agave* sap
Zymomonas, 41:1
- Air pollution
 effects on leukocytes, 41:205
- Algae
 bleaching by virginiamycin family, 43:145
- Algae, phototactic
 light antennas, 44:572
- Algal toxins, 42:725
- Alpha-toxin
S. aureus, 43:320
- Amidase system
Pseudomonas, 43:73
- Amino acid catabolism
 branched chain, 40:42
 enoyl-CoA hydratases, 40:42
 enzymes common to, 40:42
 inhibition of growth by, 40:42
- Amino acids
 antagonism and growth inhibition, 43:42
 fluorescent pseudomonads, 43:422
- Aminocyclitols
 biosynthesis, 41:595
- Aminoglycosides
 biosynthesis, 41:595
- Amphidinium* spp.
 toxins, 42:725
- α -Amylase
Bacillus synthesis, 41:711
- Anabaena flos-aquae*
 toxin, 42:725
- Anaerobes
 chemotrophic, 41:100
 energy conservation, 41:100
- Anaeroplasmas
 ecology, 42:414
- Anesthetics
 African trypanosomes, 42:661
- Angiosperms
 carbamoyl phosphate biosynthesis and utilization, 42:307
- Animal cells
 chromatin replication, 43:297
- Animal diseases
F. necrophorum, 41:373
- Animals, domestic
 use of virginiamycin family, 43:145
- Antibiotic biosynthesis
 control, 44:230
- Antibiotic permeation
E. coli membrane, 42:614
- Antibiotic production

- genetics, 41:595
- incidence, 41:595
- physiology, 41:595
- Antibiotic resistance
 - mutations that affect sporulation, 40:908
 - Pseudomonas*, 43:73
- Antibiotics, virginiamycin family
 - action, 43:145
 - chemistry, 43:145
 - physics, 43:145
- Antibiotic synthetases
 - repression and inhibition, 44:230
- Antibody production
 - in absence of antigen stimulation, 44:631
- Antigens
 - E. coli*, 41:667
 - mycobacteria, 42:84
- Antigens, *Bacteroidaceae*
 - serological responses, 43:103
- Anti-idiotypes
 - immune response autoregulation, 44:631
- Antimicrobial agents
 - temperature, 43:241
- Aphanizomenon flos-aquae*
 - toxin, 42:725
- Aquaspirillum*, 40:55
- aro anabolic enzyme aggregate
 - Neurospora*, 43:361
- Aromatics
 - microbial cooxidation, 43:59
- Asexual life cycle
 - in *N. crassa*, 40:1
- Aspergillus flavus* subgroup
 - metabolites, 41:822
 - mutant strains, 41:822
- Aspergillus nidulans*
 - antibiotic synthesis, 41:595
 - carbamoyl phosphate biosynthesis and utilization, 42:307
- Asporogenous mutants, 40:908
- Atmosphere
 - primitive, 42:251
- Atrophic rhinitis, swine
 - B. bronchiseptica*, 44:722
- Autoimmune diseases
 - linkage to measles virus, 41:636
- Autotrophy
 - evolutionary aspects, 42:251
 - relation with methylotrophy, 42:251
- Avian systems
 - carbamoyl phosphate biosynthesis and utilization, 42:307
- Azospirillum*
 - taxonomy, 44:491
- Azospirillum brasilense*
 - nitrogenase, 44:491
- Azotobacter vinelandii*
 - pyridine nucleotide cycle metabolism, 44:83
 - respiratory chain energy conservation, 41:47
 - respiratory protection of nitrogenase, 41:47
- Bacillus*
 - bacteriocins, 40:722
- Bacillus* antibiotics
 - biosynthesis, 41:449, 41:595
 - cell-free synthesis, 41:449
 - enzymatic formation, 41:449
 - functions, 41:449
- Bacillus* exoenzymes
 - genetic analysis, 41:711
 - physiological functions, 41:711
 - synthesis, 41:711
- Bacillus* fatty acids
 - analysis, 41:391
 - biosynthesis, 41:391
 - branched-chain preference, 41:391
- Bacillus subtilis*
 - carbamoyl phosphate biosynthesis and utilization, 42:307
 - chromosome, 44:57
 - phage SP01 development, 41:568
 - sporulation, 41:568
- Bacitracins
 - Bacillus* antibiotic, 41:449
- Bacteria
 - carbohydrate transport, 44:385
- Bacterial bioluminescence
 - control, 43:496
 - ecological significance, 43:496
- Bacterial cell-free systems
 - action of virginiamycin family, 43:145
- Bacterial endospore formation
 - genetic aspects, 40:908
- Bacterial infection
 - exacerbation by influenza virus, 44:303
- Bacterial infections
 - B cells, 40:284
 - cell-mediated immune mechanisms, 40:284
 - humoral antibodies, 40:284
 - T cells, 40:284
- Bacterial plasmids
 - molecular rearrangements, 40:168
 - plasmid designations, 40:168
 - plasmid gene abbreviations, 40:168
 - uniform nomenclature for, 40:168
- Bacterial respiration
 - ATPase complexes, 41:47
 - A. vinelandii*, 41:47
 - E. coli*, 41:47
 - electron transport chains, 41:47
 - P. denitrificans*, 41:47
- Bacterial spore coat
 - coat polypeptides, 40:360
 - layers, 40:360
 - morphogenesis, 40:360
 - outer coat, 40:360
 - structure, 40:360
- Bacterial transport mechanisms
 - phosphoenolpyruvate:sugar phosphotransferase, 41:856
- Bacteriochlorophyll
 - Rhodospirillaceae*, 42:357
- Bacteriocins
 - classification, 40:722
 - detection, 40:722
 - genetic determinants, 40:722
 - in gram-positive bacteria, 40:722
 - nomenclature, 40:722

- properties, 40:722
- Rhodospirillaceae*, 42:357
- S. mutans*, 44:331
- Bacteriophage
 - d'Herelle's discovery, 40:793

MICROBIOLOGICAL REVIEWS

VOLUME 44

BALTIMORE, MD.
1980

MICROBIOLOGICAL REVIEWS

COPYRIGHT © 1980, AMERICAN SOCIETY FOR MICROBIOLOGY

CONTENTS

Linkage Map of <i>Escherichia coli</i> K-12, Edition 6. BARBARA J. BACHMANN* AND K. BROOKS LOW	1-56
The <i>Bacillus subtilis</i> Chromosome. DENNIS J. HENNER* AND JAMES A. HOCH	57-82
Nicotinamide Adenine Dinucleotide Biosynthesis and Pyridine Nucleotide Cycle Metabolism in Microbial Systems. JOHN W. FOSTER* AND ALBERT G. MOAT	83-105
Bacterial Lactate Dehydrogenases. ELLEN I. GARVIE	106-139
Biology and Physiology of the Lower Trypanosomatidae. R. BARCLAY MCGHEE* AND WILLIAM B. COSGROVE	140-173

Erratum

Nonenteric Toxins of <i>Staphylococcus aureus</i> . MARVIN ROGOLSKY	174
---------------------------------------------------------------------------	-----

CONTENTS

5'-Terminal Cap Structure in Eucaryotic Messenger Ribonucleic Acids. AMIYA K. BANERJEE	175-205
Genetics and Molecular Biology of <i>Streptomyces</i> Bacteriophages. NATALIE D. LOMOVSKAYA, K. F. CHATER,* AND NORAH M. MKRTUMIAN	206-229
Control of Antibiotic Biosynthesis. JUAN F. MARTIN* AND ARNOLD L. DEMAIN	230-251
Formation and Positioning of Surface-Related Structures in Protozoa. KARL J. AUFDERHEIDE,* JOSEPH FRANKEL, AND NORMAN E. WILLIAMS	252-302
Pathogenicity of Influenza Virus. C. SWEET* AND H. SMITH	303-330
Biology, Immunology, and Cariogenicity of <i>Streptococcus mutans</i> . SHIGEYUKI HAMADA AND HUTTON D. SLADE*	331-384

CONTENTS

Carbohydrate Transport in Bacteria. STEVEN S. DILLS,* APRIL APPERSON, MARY R. SCHMIDT, AND MILTON H. SAIER, JR.	385-418
<i>Clostridium botulinum</i> Neurotoxin. H. SUGIYAMA	419-448

CONTENTS

Biochemical Genetics of Nitrogen Fixation. WINSTON J. BRILL	449-467
Viruses of Guinea Pigs: Considerations for Biomedical Research. G. D. HSIUNG,* F. J. BIA, AND C. K. Y. FONG	468-490
Evaluation of Nitrogen Fixation by Bacteria in Association with Roots of Tropical Grasses. P. VAN BERKUM* AND B. B. BOHLOOL	491-517

VOLUME 44 • DECEMBER 1980 • NUMBER 4

CONTENTS

Genetic Map of <i>Saccharomyces cerevisiae</i> . ROBERT K. MORTIMER* AND DAVID SCHILD	519-571
Light Antennas in Phototactic Algae. KENNETH W. FOSTER* AND ROBERT D. SMYTH	572-630
Autoregulation of Immune Responses via Idiotypic Network Interactions. L. SCOTT RODKEY	631-659
Immunity to <i>Candida albicans</i> . THOMAS J. ROGERS* AND EDWARD BALISH	660-682
<i>Sporothrix schenckii</i> and Related Species of <i>Ceratocystis</i> . LUIZ R. TRAVASSOS AND KENNETH O. LLOYD*	683-721
Biology of <i>Bordetella bronchiseptica</i> . ROBERT A. GOODNOW	722-738
Cellular Nucleotide Measurements and Applications in Microbial Ecology. DAVID M. KARL	739-796

Erratum

Evaluation of Nitrogen Fixation by Bacteria in Association with Roots of Tropical Grasses. P. VAN BERKUM AND B. B. BOHLOOL	797
----------------------------------------------------------------------------------------------------------------------------------	-----
